Standard Features

- ♦ All Vertical Platforms are stackable.
- ♦ Vertical Platforms include curved top cap and base kick plate.
- ♦ Vertical Platforms are available in eight widths - 18", 24", 30", 36", 42", 48", 54" & 60".
- ♦ Six standard platform heights available - 43", 56", 69", 82", 95" & 108".
- ♦ Stack-on Vertical Platforms are available in 13" and 26" heights.
- ♦ Stacked Vertical Platforms up to 69" in height shipped assembled.
- ♦ Lay-in voice/data & electrical cable distribution at all levels of the platform.
- ♦ Cabling may be routed both vertically and horizontally throughout the platform.
- ♦ Power entry and voice & data cabling may enter at any point along the base of the platform.
- ♦ 3 1/2" finished panel thickness (2 1/2" deep interior cavity)
- ♦ Straight line platform to platform connectors included.
- ♦ 3" adjustable leveling glides.
- ♦ Non-progressive platform-to-platform attachment.
- ♦ On and off-module attachment of Vertical Platforms, horizontal work platforms & upper storage.
- ♦ Vertical Platforms come with standard semi-flat black paint finish.
- ♦ Vertical Platforms are available **xXposed** in all standard textured paint finishes.

Special Top Cap

Chicago Electrical

Junction Box		
	XCB	\$427
Junction Box Metal Mounting Brackets		
	XCA	\$57

New York City Base Feed Kits

Base Power Feed Kits for the city of New York		
30"L	XNBP	\$781

Note: This base feed must connect to a XPT.XXXX (I.E. XPT.3600 36"pass-thru cable) which will then connect to the Power Harness.

Note: To order correct length, add width of vertical platform containing infeed plus any additional vertical platforms that must be passed through.

30"L	XNBH	\$781
------	------	--------------

Note: This base feed is used when you are powering below the horizontal work platform of the same vertical platform in which the base feed will be located.
No pass-through cable is required.

Cable Hanger

	Description	Model No.	Price
	Carries voice and data cables inside the vertical platform.	XCH	\$17

Outlet Voice/Data Covers

	Outlet Covers to fill unused ports in electrical / Voice Data Faces.	XPB.BK	\$7
--	--	--------	-----

	Voice & Data Plug in Cover. (Accepts RJ11 & RJ45 inserts)	XVDC.BK	\$10
---	---	---------	------

NOTE: Fits Amp, Leviton or similar style jacks.

xXtreme Vertical Platforms may be extended to the ceiling to create a floor-to-ceiling fully enclosed office space. Ceiling track is attached to the drop ceiling grid allowing the vertical platform to be inserted. Custom Faces must be ordered for ceiling height conditions. Ceiling track is shipped in 8' and 10' lengths, corners come preformed. Tegular Ceiling clips are included.

The following formula is used to determine the height of a Custom Stack-On Vertical Platform:

Determine the overall height of the ceiling at the lowest point (field measurement required) and deduct 4" from that ceiling height. The remaining height is the required height of the floor-to-ceiling vertical platform to be used. See fig. 1 below for sample ceiling heights and the height of the Custom Stack-On Vertical Platform.

NOTE: Specify type of ceiling grid. Standard grid size 9/16" or 15/16"

NOTE: Factory will determine the correct face size to fit custom platform height.

NOTE: Factory is not responsible for field measuring of ceiling height. factory will determine finish custom frame height after field measured ceiling heights have been received.

NOTE: Ceiling & Floor Track must be ordered - see page 5.6

NOTE: Layout drawing is required to determine ceiling channel parts required.
