- Fabric Tackboards are 5/8" thick and are affixed to laminate panels using two-sided tape or velcro.
- When affixed to a laminate privacy panel, tackboards are placed above the steel clips, leaving a 2" gap between the worksurface and the bottom of the tackboard. A 10" high tackboard should therefore be used for an 12" high laminate privacy panel.
- For mounting to a wall, add OPT-TCKWAL for \$10 per tackboard for fabric caps/buttons to conceal screws.

# Power and Data Options

## ABOUT TEAMWORX POWER AND DATA OPTIONS

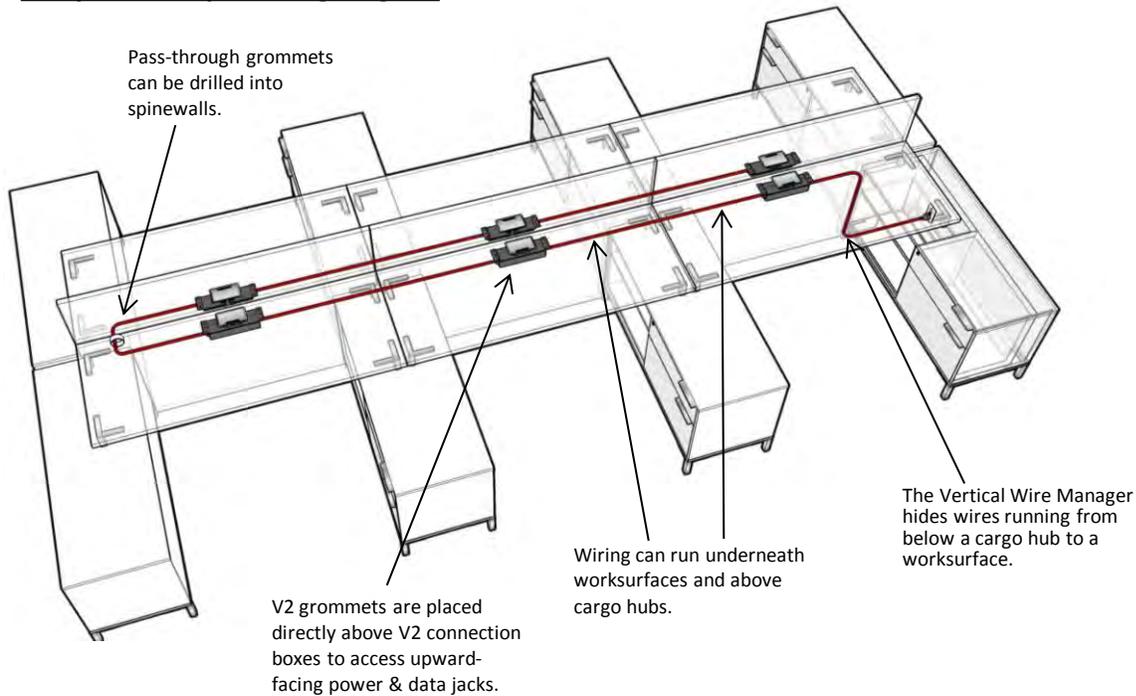

TeamWorx offers two daisy-chained power systems. All components are **UL-listed** and made in the USA.

In a daisy-chained system, power only needs to be provided to the first station in a cluster, and that first station then “passes on” the power to the next station, which passes it to the next station, and so-on. Daisy-chained systems are also considered safer, and may be required in certain installations due to safety regulations.

Our **V2 system** offers daisy-chained power plus data, and includes a worksurface flip-top grommet for accessing the upward-facing power/data units. It is a 4-wire/2-circuit system.

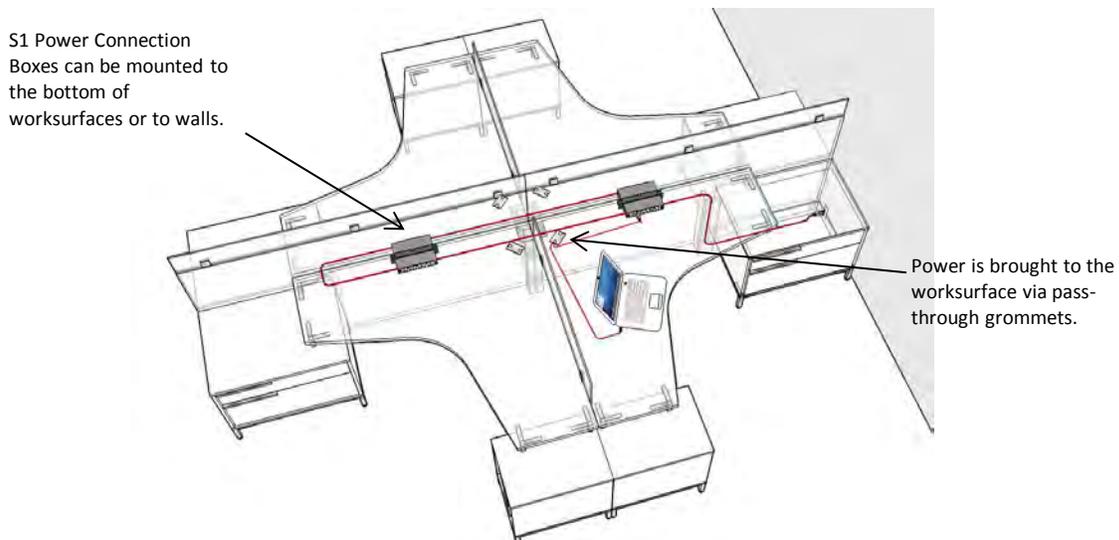

Our **S1 system** is a value-priced daisy-chained system that requires pass-through grommets to bring power cabling to the worksurface. It offers one option with data and one option without data. It is an 8-wire/3-circuit system.

### V2 System Sample Wiring Diagram

Approximate list price as shown above: **\$2,544** (\$424 per station). Pricing assumes 60" interconnect cables and platinum finish grommet.

### S1 System Sample Wiring Diagram

Approximate list price as shown above: **\$1,174** (\$294 per station). Pricing assumes 72" interconnect cables and rectangular pass-through grommet.
