Stainless Steel Ball with HydroMax

Fusion CF Ball with HydroMax

**Stainless Steel Ball with HydroMax Technology**

**Fusion CF Ball with HydroMax Technology**

**Swing-Out™ Valves**

Akron Brass continues to offer a wide variety of apparatus valves to meet the demands of today’s fire service. All Swing-Out Valves are designed for operating pressures of at least 250 psi (17 bar) and meet the NFPA 1901 Standard for valve opening and closing speed control when operated with a gear actuator, electric actuator or Slo-Cloz™. In addition, every valve is factory tested in accordance with current NFPA Standards.

- A single valve body that will accept a variety of actuators*.
- HydroMax™ technology: A patent pending ball geometry providing operating and flow performance never seen before in apparatus valves.

**Swing-Out Valve Features:**
- 90° handle travel
- No lubrication or regular maintenance required
- Simple two seated design (no O-Rings to cut or lose during assembly or maintenance)
- Wide range of available adapters (reference valve guide for availability)
- High quality brass body – Cast, machined and assembled at our facility in Wooster, Ohio

8600 Heavy Duty Swing-Out Valve Series
- Available actuators: SZ, Manual Gear, Electric and Rack and Sector
- Available in 2” thru 3 ½” sizes
- 316 Stainless Steel ball with HydroMax™ technology

8600 Heavy Duty Swing-Out Valve Series
- Available actuators: R1, TS, TSC
- Available in 1” thru 4” sizes**
- 316 Stainless Steel ball with HydroMax™ technology

8900 Heavy Duty Swing-Out Valve Series
- Available actuators: R1, TS, TSC, SZ, Manual Gear, Electric and Rack and Sector*
- Available in 1” thru 4” sizes**
- Fusion CF™ Composite ball with HydroMax™ technology

*Rack and Sector body is unique to Rack and Sector assembly and not interchangeable with other actuators

** 4” valve only available with manual gear, electric or air actuators. 8840 is also a flat ball.

Refer to valve guide (page 198-205) for ordering information

Stainless Steel Ball with HydroMax

Fusion CF Ball with HydroMax

* 250/500 psi rated only in one direction. 100 psi operating pressure / 180 psi hydrostatic pressure rated in opposite direction.
**Swing-Out™ Valves**

**Heavy Duty 4" Swing-Out Valve With Flat Ball Design**

**8840 Heavy Duty 4" Valve**
- Designed for tank to pump use, deck gun or other higher flow applications
- Flat ball concept - Flat ball has spherical seating surface that easily closes and seals on the seat
- Use with air, gear or electric actuators
- Short body length - Only 4" long, can be used on side discharge applications and in restricted pump compartment space
- Easy to operate sealing system requires less torque to open and close the valve
- Reduced gear ratios:
  - Electric: 25:1 ratio - 8 seconds full open to close
  - Handwheel 50:1 ratio - 12 1/2 turns
- Weight: 36 lbs. (with electric actuator, less adapters)
- Wide range of available adapters (See pages 198-205)

**4" Swing-Out Valve**

**8940 4" Swing-Out Valve**
- Designed for tank to pump use, deck gun or other higher flow applications
- Air, handwheel or electric actuation only
- All Fusion CF™ Composite Ball

**Lightweight Apparatus Swing-Out Valve**

**7725 2 1/2" Lightweight Apparatus Swing-Out Valve**
- Ideal for use on aerial platforms
- Durable lightweight Pyrolite® construction
- Full flow 2 1/2" waterway
- Simple two seated design (no O-Rings to cut or lose during assembly or maintenance)
- No lubrication or regular maintenance required
- Designed & tested to exceed NFPA requirements
- Weight 9 1/2 lbs.

**Adapter Options:**
- MEST-S 90° Elbow
- PI-S Female NPT
- M1-S Male
- FI-S Female Swivel
- FI-SS Female Swivel with Strainer

**Self Locking**
- Tork-Lok® for Easy Positioning

**Optional Body with Thru Holes for Direct Connection to a Manifold**

**Optional Swiveling 90° Elbow (ME1-S)**
**Manual Actuators**

- **R-1** Handle for remote valve operation of 8800 Series Swing-Out Valves
- **TS** Handle for direct valve operation through the panel operation of 8800 Series Swing-Out Valves
- **TSC** Handle with cover for exterior mounted 8800 Series Swing-Out Valves
  - Same as the TS handle, with cover
- **SZ** Handle with Twist Lock for direct valve operation through the panel of 8625-8635 Swing-Out Valves

**Handwheel Actuators**

Handwheel Actuators are used for smooth, precise operation of valves such as on a deck gun, large diameter side discharge or ladder pipe.

- Fits 2" - 4" valves
- Handwheel driven worm gear rotates a gear sector for smooth and easy operation under pressure
- 2" - 3 1/2" valves have a 50:1 ratio and a 4" handwheel
- 8840 valves have a 50:1 ratio and a 6" handwheel
- Number of turns for full open/close:
  - 2" - 3 1/2" Swing-Out™ valves - 12 1/2 turns
  - 7840 - 16 turns
  - 8840 - 12 1/2 turns
- Opening and closing speed complies with the current NFPA standard to minimize effects of water hammer
- Helps prevent valve drift and accidental slamming open or closed
- Position Indicators for gear operated valve
- Optional Position Indicators show the valve position to meet NFPA 1901
  - Must specify landscape (side mount) or portrait (top mount)
  - Size: 3 1/2" x 5 3/4"
- Auxiliary Position Indicator - optional

**Electric Actuators**

Akron’s electric actuator is now equipped with a magnet in the trunion to provide true position feedback. The motor, pressure, and flow sensor connections are all located right on the valve for shorter wire runs and simpler installation. The electronics are fully sealed and utilize deutsch connectors for long life and reliability.

- Speed of valve opening and closing is preset to comply with the current NFPA 1901 Standard
- Operates on 12 or 24V apparatus electrical systems - Must specify
- Gear drive ratio:
  - 2" - 3 1/2" Swing-Out™ Valves - 16:1
  - Style 8840 - 25:1
  - Style 7840 and Butterfly Valves (4" - 8") - 64:1
  - Works with Weco & Keystone Butterfly Valves
- Manual override

See page 88 for dimensions
Swing-Out™ Valves Actuators

Air Actuator

Air Actuators operate off the apparatus air supply and are equipped with an emergency override. Designed for full open/close applications only. Units are supplied with two air flow control valves to regulate the opening and closing valve speed to comply with the current NFPA 1901 Standard.

- Operates from -40° F to 125° F and requires 100-120 psi air pressure
- Available on 4" Swing-Out and all Butterfly Valves
- Solenoid and switch not included

Rack And Sector Actuator

Minimizes troublesome linkage problems associated with remote handles. The Rack and Sector Actuator is usable with most pumps (depending on pump panel width). Available on 2 1/2" - 3 1/2" valves.

Slo-Cloz™

The Slo-Cloz reduces the chances of ruptured water lines, burst hose, or damaged seats and gaskets by controlling the opening and closing speed of the valve. The unit fits Tork-Lok® and current 2" - 3 1/2" locking and non-locking valves as well as valves with a Rack and Sector Actuator. Meets NFPA 1901.

7675 Slo-Cloz
- Use with 8620-8635 non locking valves
- 2 1/2" - 3 1/2" valves with a Rack & Sector Actuator

7875 Slo-Cloz
- Use with 8820-8835 Tork-Lok and self locking valves
**Remote Controls**

### T-Handles
- Push/Pull Remote Controls or sold separately

### Push/Pull Remote Controls
Push/Pull Remote Controls operate in-line valves from the pump panel. Remote Controls can be used with Swing-Out" Valves through 3 1/2" with R-1 Handles and are lockable in any position. The remote controls are furnished with an escutcheon plate, male or female swivel joint and stainless steel spring locks.

- Two stroke lengths available:
  - 8 1/4" for 1", 1 1/2", and 2" valves
  - 11 1/4" for 2 1/2", 3, and 3 1/2" valves
- Optional ball joint assembly
- Weight: 2 lbs.

Navigator™ Pro Valve Controller

Navigator Pro Valve Controller

The Valve Controller from Akron Brass provides reliable and accurate valve control with valve position indication. It is packed with user friendly features that improve operation effectiveness and safety.

9323 Electric Valve Controller
- Valve open and close.
- Full color LCD display that does not wash out in bright sunlight and visible from all angles.
- True position feedback from the valve.
- User programmable presets. Easy to configure for the first time and then to activate on the fire scene.
- % open text shown on valve bar graph. Can be disabled if it is not desired.
- Color indication available. Optional color indicators are available as well as the ability to program in the valve name and the discharge color on the top bar of the display.
- USB port on-board. Software for display and motor driver can be easily updated via USB flash drive.
- Easy to navigate setup menu. With additional buttons, menus are much easier to navigate and configure.
- Auto dimming capability. Display will sense ambient light and adjust brightness automatically. This feature can be disabled if a set brightness is desired in all conditions.
- Multiple display. Multiple displays can be used to control the same valve. No longer limited to two displays - 3, 4 or even 5 can be used and easily installed.
- Auto open. When option is turned on and valve is closed, pressing the open button once will automatically open the valve all the way.
- Installation flexibility with multiple options for power connections. Power for the motor can be run from the display or powered directly at the valve.
- For use only with Navigator Pro Electric Actuator. See page 87 for Actuator details.

9325 Navigator Pro Controller

All the same features as the 9323, plus the following:

- Valve open and close.
- Optional pressure display. Can be displayed in PSI, kPa or bar.
- Optional flow display. Can be displayed in GPM or LPM.
- CAFS integration: turn CAFS on and off.
- Make sure even the most turbulent of flows is accurate with available custom calibration. Now easier than ever to custom calibrate the flow sensor through an easy to navigate menu.
- Zero cutoff feature to eliminate ghost readings when installed close to the pump.
- Totalizer function. Controller will calculate the volume of water flowed, through the paired valve. Resets every time the power is cycled to the valve. When networked with other 9325 controllers, total flow across all valves is shown.

Optional color indicators available in standard NFPA 1901 specified colors. Available on Styles 9323 and 9325.
Flow Meter & Pressure Relief Valves

Flow/Pressure Meter

- Programmed Calibration - More reliable than mechanical methods
- More accurate through broad ranges of flow
  - Technically advanced electronics
- Flow & Pressure - One meter provides both flow and pressure readings
- Easy Installation - Valve Adapters available for quick/easy installation. Saddles and Weld Bosses also available
- Fully Tested - Vibration, high & low temperature, high flow & pressure, endurance, actual field tests
- Meets NFPA 1901 for accuracy

9300 Flow/Pressure Meter

- Includes Meter, Flow Sensor, Pressure Transducer and Cables
- Order Flow Port Valve Adapters with the valve
- Saddle clamp and Weld Bosses must be ordered separately

NOTE: Exclusive Programmed Calibration

Unique plumbing configurations are not a problem. The Akron Flow/Pressure Meter is the only unit in the fire service designed to be custom calibrated to individual applications for superior accuracy. This is particularly valuable when a sensor is close to a valve or elbow.

Intake Pressure Relief Valve

59 Intake Pressure Relief Valve

For mounting on main pump intakes with a four bolt flange. Field adjustable pressure setting.

Butterfly Valves

Available in 4”, 4 1⁄2”, 5”, and 6” full flow sizes. Meets NFPA 1901 Standard for opening and closing speed when used with Gear*, Air or Electric Actuators. Manual quarter-turn handle is available for dump valve applications. Body and adapters are lightweight pyrolite construction. Optional drain valve available.

Optional Inlets & Outlets:
- Male
- Female NPT
- Female Swivel (Rocker lug or long handle)
- Victaulic
- Storz (Swivel standard on 4” & 5”, 6” rigid only)

Heavy-Duty Jamesbury® Butterfly Valves

The trusted and proven Navigator™ Pro electric actuator is now paired with the rugged Jamesbury high performance butterfly valve and available as a complete, tested package. The Jamesbury butterfly valve has proven itself in the fire industry as a long lasting, high performing, and reliable valve.

- Available in 4”, 5”, 6” and 8” full flow sizes in carbon or stainless steel (must specify when ordering)
- Heavy-duty electric actuator with true position feedback
- For use with Style 9323 or 9325 Navigator Pro valve controllers
- Designed to mate directly to ANSI 150# flanges
- Meets NFPA 1901 requirements

Drain Valves

57 Quarter Turn Drain Valve
- T-handle extends 2" from the panel for easy turning
- Available in 0° or 90° handle position - Must specify
- For hydrostatic pressures up to 500 psi
- 1/4" NPT threads
- Weight: 1 1/2 lbs.

4 Drainit Drain Valve
- Small, compact drain valve
- 1/4" NPT male thread
- Opening equivalent to 1/8" diameter hole
- Length: 2 1/4"
- Weight: 10 oz.

7 3/4" Drain Valve
- Push-pull valve for draining discharge, suction, or in-line valves
- For hydrostatic pressures up to 500 psi
- Brass handle shaft and body
- 1/4" NPT female inlet and outlet thread
- Weight: 1 1/4 lbs.

Gate Valves

A heavy-duty wedge seat gate valve with a non-rising stem and crank handle for easy operation at standard operating pressures.

285 2 1/2" Gate Valve - Brass

2285 2 1/2" Gate Valve - Pyrolite

2286 3 1/2" Gate Valve - Pyrolite
- Less than 1 psi friction loss @ 1500 gpm

**Revolution™ Intake Valve**

The Revolution Intake Valve is like no other. Featuring a unique patent-pending handwheel design, the Revolution provides the operator more control and leverage for a smooth and easy operation. This revolutionary valve is constructed of corrosion-resistant, hard-anodized aluminum and stainless steel with a powder coated interior and exterior finish for superior corrosion protection.

**Compact Design**

Its compact design saves valuable space on your pump panel. The revolutionary handwheel design hugs tightly to the valve body eliminating possible interference with surrounding discharges and equipment on the pump panel.

**Revolutionary Features**

The Revolution has all of the standard features you would expect from an intake valve with flows capable up to 2000 gpm (7600 lpm) making it ideal for the most demanding apparatus intake applications.

- Field serviceable design
- NFPA 1901 compliant
- 10 year heavy duty warranty*

Hydrant Valve

627 4-Way Hydrant Valve
This valve allows you to provide water to the fire at hydrant pressure, while waiting for a second pumper to hook up and increase flow and pressure.
- Flow efficient 3 1/2” waterway
- 75 psi maximum pressure differential during changeover
- 300 psi maximum operating pressure
- 1000 gpm maximum flow when changing the ball position
- Mounting bracket available

How It Works:
Step 1 - Attach the 4-Way Hydrant Valve to the hydrant and forward lay to the engine at fire scene.
Step 2 - Attach a hose from the 4-Way Hydrant Valve to the intake on the engine at the hydrant.
Step 3 - Attach a hose from the discharge on the engine at hydrant to the 4-Way Hydrant Valve inlet. Establish recirculating flow at hydrant pressure.
Step 4 - Rotate the handwheel on top of the 4 way Hydrant Valve to introduce pressurized flow from the engine at the hydrant to the engine at the fire scene. Increase pressure on the pumper to increase flow as required.

Black Max Piston Intake Valve

7980 Black Max Piston Intake Valve
Corrosion resistant stainless steel and poly-impregnated aluminum are combined for a durable Piston Intake Valve. A large unique oval waterway increases efficiency while reducing the overall size. All this, plus a special 10 year warranty against corrosion makes the Black Max the obvious choice for today’s fire service.

Standard Features:
- Stainless steel piston housing
- Compact size - Extends only 11 1/2" from the pump panel
- 250 psi operating pressure
- Polymer Piston for improved corrosion resistance
- Large waterway with a cast-in turning vane for reduced turbulence and efficient flow
- Pressure relief valve adjustable from 50 - 250 psi (factory preset @ 150 psi)
- 53° elbow
- 1/4” air bleeder valve

Optional Features:
- Storz cap and chain
- Air bleeder lines

### Wyes & Water Thief

- **Style 1480** 1 1/2" Wye
  - Self-locking Tork-Lok® handles for positive handle positioning

- **Style 1482** Hydrant Wye
  - Self-locking Tork-Lok® handles for positive handle positioning

- **Style 1581** Leader Line Wye
  - Self-locking Tork-Lok® handles for positive handle positioning

- **Style 1582** Hydrant Wye
  - Self-locking Tork-Lok® handles for positive handle positioning

- **Style 2580** 1 1/2" Wye
  - High strength polymer handles

- **Style 2581** Leader Line Wye
  - High strength polymer handles

- **Style 2582** 3-Way Hydrant Wye
  - Self-locking Tork-Lok® handles for positive handle positioning

- **Style 2681** Leader Line Wye
  - Designed for heavy-duty use in severe environments.
  - High strength polymer handles & balls standard
  - Optional metal handles & balls

- **Style 273** Water Thief
  - For extending 1 1/2" or 2 1/2" lines without interfering with the operation of other lines.
  - Includes Self-locking Tork-Lok handles for more positive handle positioning.
Clappered Siamese

262 Clapper Valve Siamese
A brass Clapper Siamese with a leather carrying handle and 3/4" drain plug

266 Clapper Valve Siamese
A brass Clapper Siamese in sizes up to 6”

1256 3-Way Clapper Valve Siamese - Pyrolite®
Three 2 1/2” female inlets x 4” to 6” male or female outlet. Includes Style 4 Drainit drain valve and rubber carrying handle
- 200 psi operating pressure
- Optional Pressure Gauge

1262 Clapper Valve Siamese
A Pyrolite Clapper Siamese includes a Style 4 Drainit drain valve and a rubber carrying handle

1267 Clapper Valve Siamese
A Pyrolite Clapper Siamese includes a Style 4 Drainit drain valve and a rubber carrying handle

Gated Siamese
Siamese with quarter-turn valves provide a positive shutoff and easier operation. All 2 1/2” swivel inlets are supplied with strainers.

1483 Suction Siamese
- Tork-Lok handles for positive handle positioning
- Used on pumper suction or aerial platform inlets

1583 Suction Siamese
Used on pumper suction or aerial platform inlets. Features Tork-Lok® handles for positive handle positioning.
- Drain valve optional

2583 3-Way Suction Siamese
Used on pumper suction or aerial platform inlets. Features Tork-Lok® handles for more positive handle positioning.
- Drain valve optional
