We have established an agreement with Minnesota Multistate Contracting Alliance to allow purchases from their cooperative contract with Premier Biotech, Inc. MMCAP pricing is only available by being an MMCAP member and informing Premier Biotech, Inc. of the entity's willingness to participate. It is the buyer's responsibility to ensure this contract is not used for required competitive process items or as a substitute for other required purchasing approvals as required by Mississippi law. This contract allows agencies to save money on drug testing kits and provides that the provisions thereof may be available to any county, municipality, school board or other local public agency or authority of the State of Mississippi which may elect to purchase at the prices, terms and conditions of sale specified therein.

Please note that you should call Premier Biotech to determine your pricing under MMCAP instead of relying on the generic/main MMCAP contract pricing. The MMCAP agreement allows for an additional, easy quote process that involves minimal time and effort and can provide alternative pricing to the main pricing schedule. When developing MMCAP pricing, a provider has to offer an initial main generic pricing schedule which takes into account a broad base of customers who would be using a varying scope of products and services. However, under MMCAP provisions, the company is then able to offer reduced pricing off list price based on requirements and volume specific to a particular customer. Please reach out to the listed company representative above to find out more.
