Purpose and Need

1. Overview

a. Goals

Ocean Springs School District is planning to implement a fully functional, district-wide, premise-based, **Non-Hosted** telecommunications system utilizing VoIP, ensuring long-term growth through effective management and maintenance in the district. Ocean Springs School District invites proposals from qualified firms that can provide an on-premise VoIP telephone system

that meets or exceeds the specifications listed in this RFP. The project requires the design and implementation of a new IP telephone system and includes the interconnection of this system to the District's multi-site data and telecom network. Proposals must not only meet the current functionality requirements but should also be adaptable for future growth of users and system features.

b. Current Environment

The vendor will install an on-premise VoIP system that blends technologies into a reliable and manageable system that will grow with the needs of the District. All proposed equipment should be able to integrate with existing network infrastructures to form a complete telecommunications system that accommodates current and emerging trends. It will need to incorporate with our Valcom intercom system at the High School, as well as our aging speakers at each other school (this can be done with the addition of ATA devices.) This system should include broadcast software that has paging, scheduling, bells, and alerts built in.
