CEO MATT DAVIS

I am proud to announce that Armor Express will celebrate its' 10 YEAR ANNIVERSARY this coming May! Over the years we have grown from humble origins, working from a small cottage and workshop, to one of the top armor companies in the world! And along the way, we have accomplished much, creating jobs and saving lives. Truly our Team at Armor Express has a lot to be proud of!

Throughout our growth we have always held true to our Core Values while focusing on continuous improvement. This is evident in our 95%+ Customer Satisfaction record, and in the fact that we continue to meet or exceed our goals for Quality and Safety. Our double digit sales growth continues as does our life saving mission.

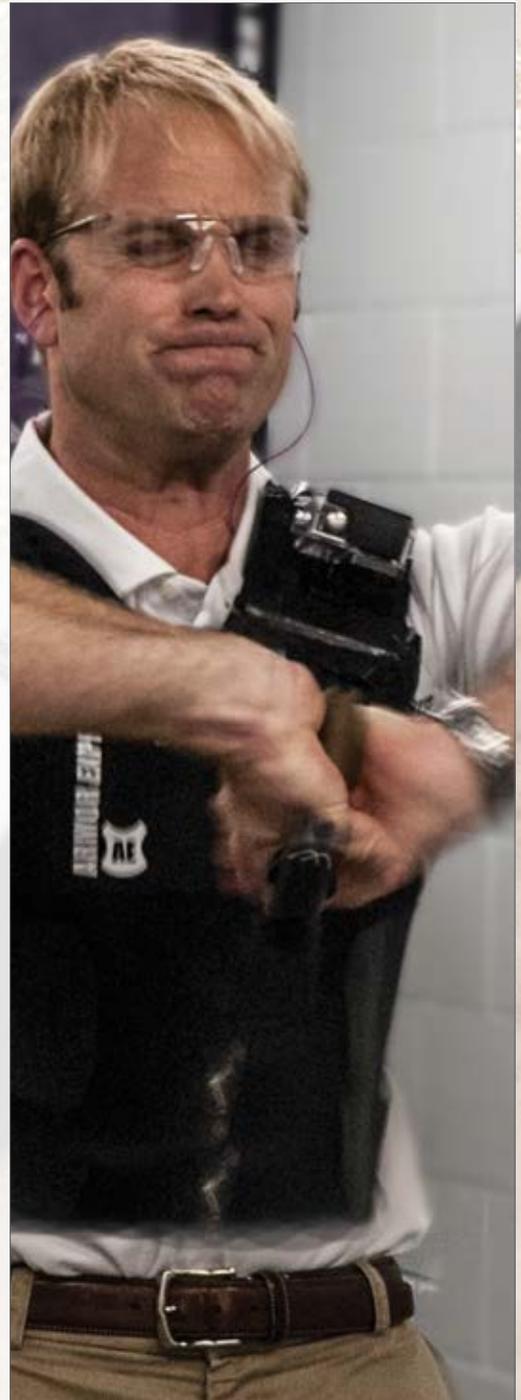

Our vision for the future is to become the premier name in public safety products. And so, we are launching many new and exciting products this year. The NEW Second Generation Vortex® and fully structured female Seraph® soft armor products (p.10) are sure to impress. Complete with a state-of-the-art quick release system and Trilogrid™ pouch platform, the NEW Raven™ raises the bar for tactical armor performance. The Traverse™ and Echo™ Outer Carriers (p.22 & 23) set a new mark for quality while the versatile C-Shock hard armor plate (p.17) can add light rifle protection to your existing concealable or tactical armor ensemble. Be sure to check out all of these outstanding new products!

In closing, I would like to share a special story that validates everything we have worked for over the past 10 years. This past summer we invited five Saves and their spouses to Northern Michigan for our first ever Saves Retreat. Our Armor Express Team was incredibly humbled by this experience as words cannot describe what we felt in sharing time with these true Heroes. It proved once again that there is no greater endeavor than serving those that protect us. To learn more about this amazing event see pages 6-7 and 61.

Here's to a prosperous 2015 and beyond as we continue our MISSION of SAVING LIVES by providing superior quality body armor with unparalleled protection, comfort, wearability and service.

Matt Davis blasts himself in front of the Smithsonian™ channel camera with a .45 ACP wearing the SERAPH™ II armor system. Go here to watch the footage: armorexpress.com/smithsonianshoot

CORE VALUES

Our family culture at Armor Express is built upon seven core values. These tenets craft our products, guide our decisions, and demand continuous improvement in everything we do. The values include: Passion, Trust, Safety, Quality, Legacy, Innovation, and Execution.

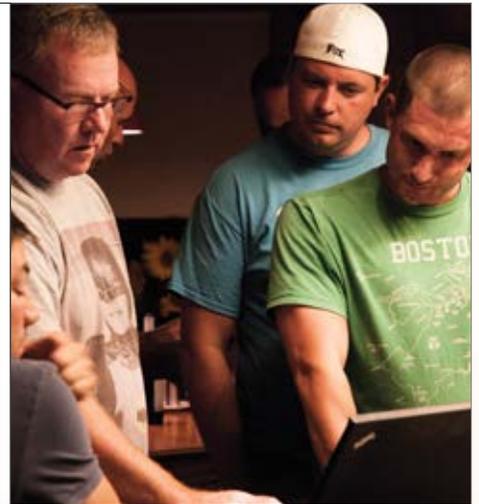

- THIS IS WHO WE ARE.

COPS HELPING COPS NEW PASSION

Over this past summer Armor Express held our first ever Saves Retreat. Led by Armor Express Saves Manager Lt. Brian Murphy, the attendees and their spouses journeyed to Northern Michigan's Pine Hollow Institute and the Armor Express headquarters. The trip offered much more than just a visit to the factory. It provided an opportunity to heal and forge new friendships by sharing their life-saving experiences with the other Officers and their families. In touring the Armor Express facility they were able to relay their stories with the passionate team members that built their vests – strengthening our resolve for what we do.

The experience validated the passion that is at the heart of Armor Express and the lessons learned will surely last a lifetime.

P A S S I O N

Passion and pride in everything that we do.

T R U S T

Designing and producing products that people trust with their lives.

S A F E T Y

Employee and customer safety is not negotiable.

Q U A L I T Y

Committed to delivering high-quality products and services - always.

L E G A C Y

Preserve and protect the body armor legacy.

I N N O V A T I O N

Drive innovation and creativity; and never fear change.

E X E C U T I O N

Execute with urgency and excellence.

A NEW CHAPTER IN THE LEGACY

Matt listens as his father, Richard Davis, reflects on one of his early armor demonstrations conducted for members of the Detroit Police Department. Matt carries on this legacy and has shot himself numerous times to demonstrate the effectiveness of his products. In July he performed the incredible demonstration for a television series on inventors airing soon on the Smithsonian Channel.

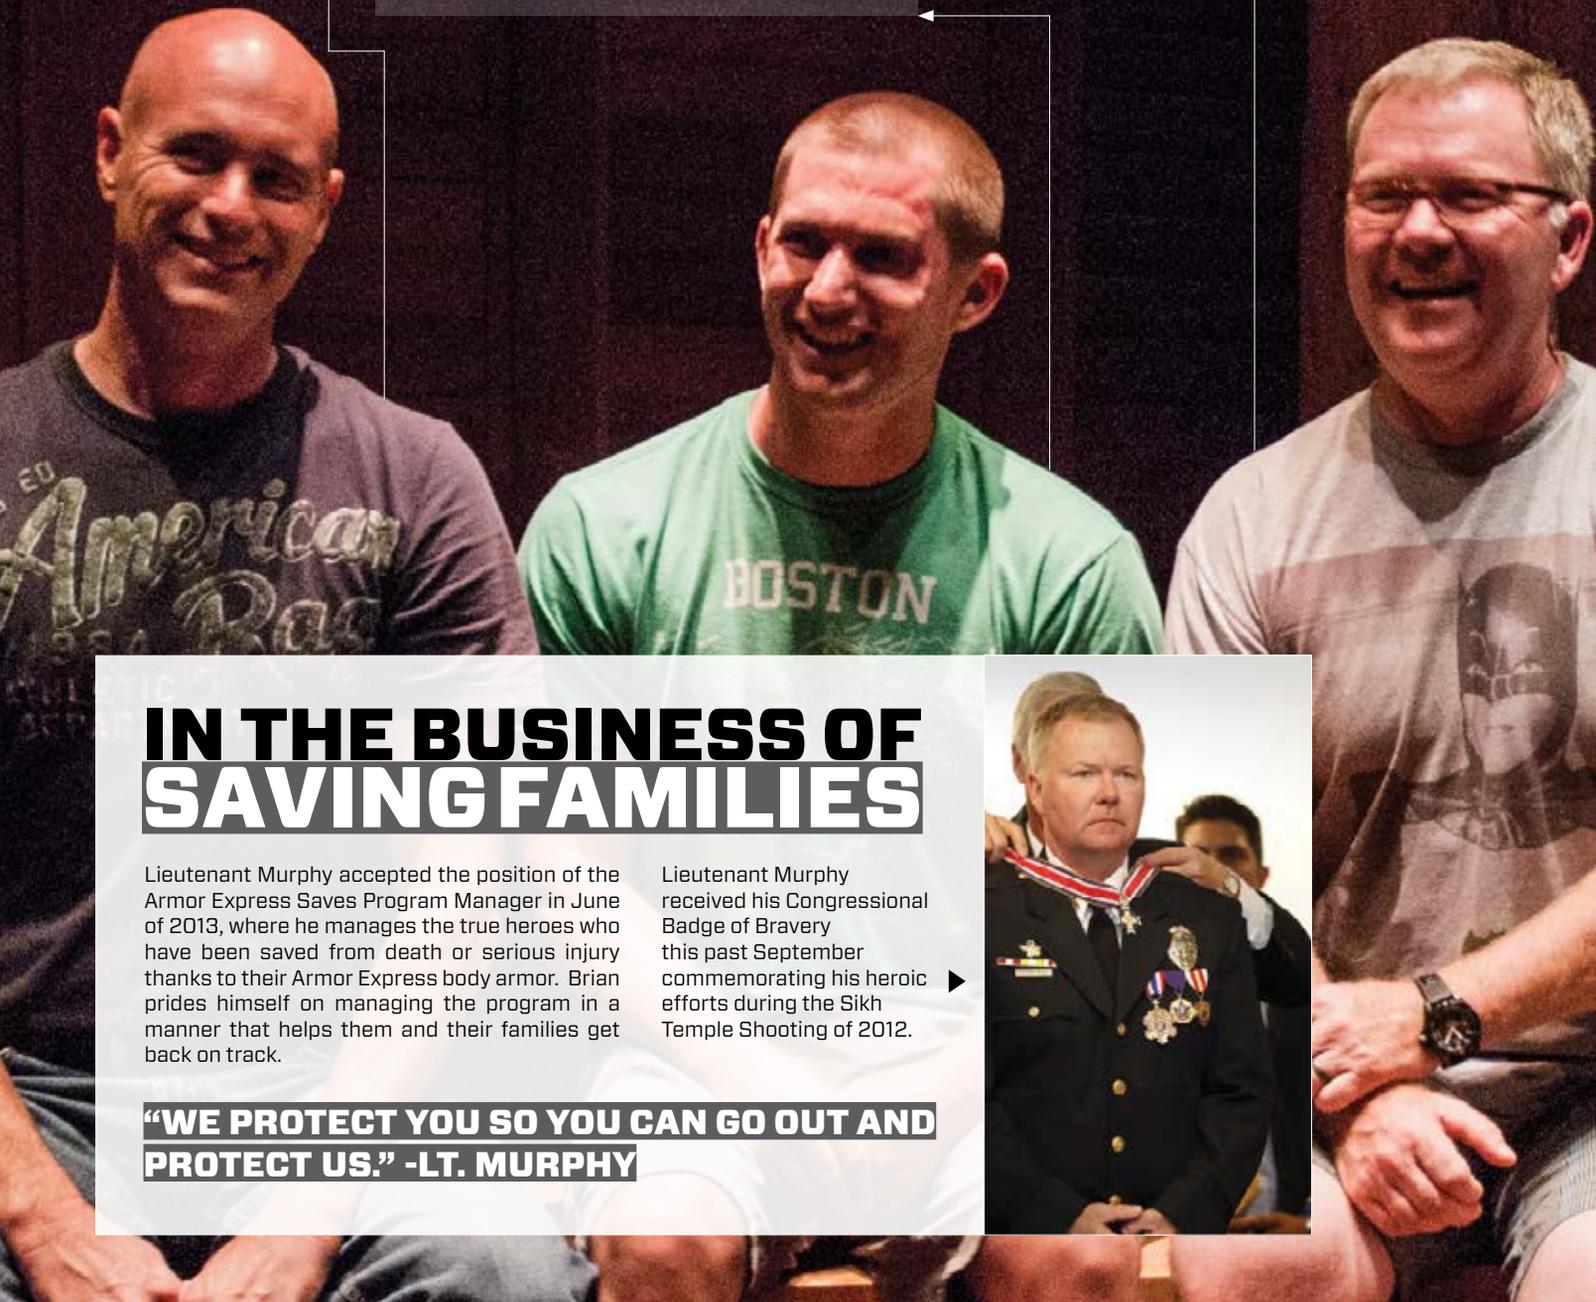

AESAVES

Armor Express strives to honor those who have faced death in the name of protecting the peace. The AE Saves program is constantly changing to meet the needs of each officer and their families and will continue to adapt and develop as the community grows in years to come. Below are a few of the Armor Express Saves.

[Officer David Wagoner] Shot three times during a routine traffic stop. David is the father of three and resides in Cape Coral Florida with his wife Patty. Two rounds hit his Halo™ II ballistic vest.

[Lieutenant Brian Murphy] Shot 15 times while engaging an assailant at the "Sikh Temple Shooting" of 2012. 3 rounds hit his Quantum™ IIIA ballistic vest. He travels the United States sharing his testimony with other officers. He is now the Armor Express Saves Program Manager and spearheads the outreach efforts of Armor Express to their customers who are part of the Saves Family. Brian and his wife Ann have three children.

[Officer Brett Morgan] Brett was hit and dragged face down under a stolen vehicle. His vitals were protected from the blunt and dragging trauma which were absorbed by Brett's Halo™ II ballistic vest and trauma insert.

IN THE BUSINESS OF SAVING FAMILIES

Lieutenant Murphy accepted the position of the Armor Express Saves Program Manager in June of 2013, where he manages the true heroes who have been saved from death or serious injury thanks to their Armor Express body armor. Brian prides himself on managing the program in a manner that helps them and their families get back on track.

Lieutenant Murphy received his Congressional Badge of Bravery this past September commemorating his heroic efforts during the Sikh Temple Shooting of 2012.

"WE PROTECT YOU SO YOU CAN GO OUT AND PROTECT US." -LT. MURPHY

BULLETPROOF

[Officer Cole Martin] Shot in the chest with a 12 gauge shotgun while responding to barricaded subject during a SWAT callout. Officer Martin just married this last September. He lives in Pierre, South Dakota with his wife Amanda and their 5 year old son. Cole was wearing Quantum™ IIIA ballistics.

[Deputy Josh Caulkins] Caulkins was shot in the chest with a 16 gauge shotgun at an arms-length distance. His Ara-Shock™ semi-rigid insert caught the majority of the threat and he was able to return to his patrol vehicle, don his tactical carrier, and return to the scene making the arrest himself. Caulkins was wearing a Halo™ IIIA concealable vest. He lives with his wife Krista in Tyler, Texas.

LAB TESTED

Many of our ballistic lines are tested with special threat requirements that go beyond the NIJ Standard. Our goal is to give our customers the peace-of-mind that can only come from putting the armor to the actual test. Our in-house state-of-the-art Ballistics Research Laboratory (BRL) sets the industry standard for organization and cleanliness. Our ballistic testing capabilities are on par with each of the NIJ certified labs in the industry today.

Seeing is believing - check out a behind the scenes look at our facility at: www.armorexpress.com/BRL

BALLISTIC RESEARCH

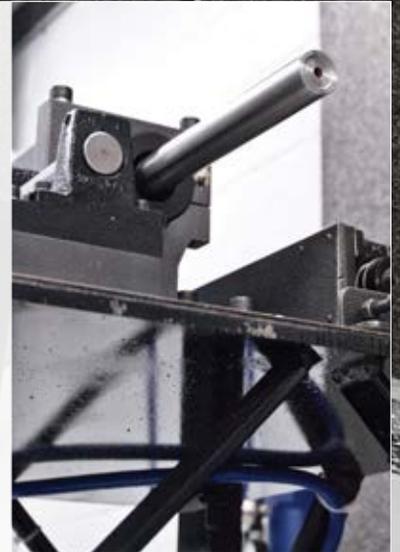

STATE-OF-THE-ART FACILITY

The Armor Express Ballistics Research Laboratory boasts an 80-foot long shooting range which accommodates ballistic testing ranging from .22 caliber to .30-06 armor piercing bullets. It is constructed with oversized concrete blocks and with a three-layered ceiling of bullet resistant steel. A protective glass viewing window affords ballisticians optimal oversight, while a custom HVAC system with HEPA filters and laminar air flow provides a

clean and safe working environment.

Two specially designed ovens heat highly pliable Roma Plastilina #1 modeling clay which is used as the test medium on which vests are shot. A state-of-the-art Oehler Chronograph and Wiseman Universal Receiver comprise other features necessary for the precise data collected by researchers performing controlled ballistic firings in the range.

SOFTARMOR

NIJ 0101.06 BALLISTICS

Description	Construction	Threat Level
 <p>New! The Second Generation Seraph™ is our top of the line armor system. It is thin, light and pliable for an outstanding user experience. Special threat tested to multiple rounds at both level II and IIIA. The IIIA is also compliant to the DEA's special testing protocol.</p>	Utilizes a unique blend of Twaron® and Dyneema® fabrics.	II and IIIA
 <p>The ultra thin Razor™ body armor is both low profile and light weight. Offering exceptional ballistic performance the Razor™ is based on innovative fabric technology from Dupont® and DSM®. Currently available in Level II but check with your AE representative as the IIIA is coming soon!</p>	Made from a blend of Kevlar® and Dyneema® fabrics.	II IIIA coming soon!
 <p>Vortex™ body armor offers users the combined properties of strength, comfort and performance, all at an incredible value. The IIIA is great for concealed wear, but is also used by tactical teams across the country. The newly certified Level II is perhaps our most comfortable armor system yet!</p>	Dupont® Kevlar® fabric (Level IIIA) and a unique combination of Twaron® fabric and Honeywell® Goldshield™ (Level II)	II (New!) and IIIA
 <p>The Halo™ armor system is known for outstanding flexibility and has been our most popular product for concealed wear. Trusted by many prestigious agencies across the country, the Halo™ offers outstanding comfort and performance.</p>	Utilizes woven Twaron® Microfilament material and Twaron® Laminated Fiber Technology.	II and IIIA
 <p>Quantum™ soft armor offers superior value. Lightweight, flexible, and a robust performer, Quantum™ armor is combat tested and proven. The IIIA is compliant to the DEA's special testing protocol.</p>	Woven and laminated Twaron® Microfilament materials.	II and IIIA
 <p>The surprisingly comfortable FMS™ is our most cost effective armor system. The IIIA is compliant to the DEA's special testing protocol.</p>	Woven and laminated Twaron® Microfilament materials.	II and IIIA

NIJ 0101.06/0115.00 CORRECTIONS

Description	Construction	Threat Level
Officers needing extra protection look to Gemini™ dual purpose armor for providing the utmost in ballistic and spike protection. The Gemini™ is a versatile performer and comfortable to wear.	Comprised of Twaron® Microfilament Fibers, spike resistant Aramid materials.	Level IIA/Spike 3 Level II/Spike 2 Level IIIA/Spike 3
Taurus™ correctional armor provides corrections officers essential puncture protection from prison shanks and spikes and is extremely light weight and flexible.	Comprised of Twaron® Microflex material.	Spike 1, 2, 3

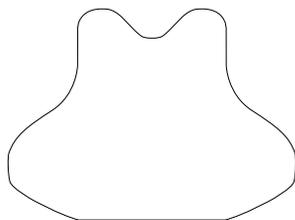

Soft armor comes protected in a seam-sealed ripstop pad cover. Each configuration is certified to the National Institute of Justice (NIJ) Standards, as well as vigorously tested in-house at our Ballistics Research Laboratory (BRL). During testing we go above and beyond the anticipated testing protocols in order to ensure that our armor products are second to none.

CONCEALABLE

The Revolution™ shown here with the new Tactical Upgrade after being shot with 12 gauge Buckshot. A hidden medical information strip on the Tactical Upgrade allows responders to quickly access medical history, blood type, and other pertinent medical information.

- CONCEALABLE CUTS -

LEGACY

Custom fitted products are at the heart of the Armor Express concealable line.

The Legacy cut is custom measured to fit each individual officer and is achieved through the collection of key measurements - ensuring the perfect size.

REVOLUTION™

Durable and light weight microfiber outer shell

Breathe-O-Prene® padded shoulders for added comfort and weight disbursement

Easy Grip Side Straps™

Breeze Knit™ moisture wicking, anti-microbial inner lining

Interior suspension system prevents sagging of the armor panels

5"x8" and 7"x10" front plate pocket accommodates inserts for added protection

Interior microfiber Wearstrip™ provides greater durability along duty belt

New! TACUPGRADE (and IFAK pouch)

Black Tan Navy

Brown White Lt. Blue

UPGRADES

Customize your Revolution™ with these three different upgrades.

These upgrades can increase your safety on the job and give you the confidence to perform your duties without a second thought.

SCENTLOK

Add a Scent-Lok® inner lining for superior odor control.

THOR SHIELD

Thor Shield™ inner liner for protection against TASER® brand devices and stun gun threats.

TACUPGRADE

The Tactical Upgrade has a hidden medical information strip, a hidden knife pocket, and an attachment point for ID badges.

The Revolution™ is AE's top of the line concealable carrier system. Loaded with features, the Revolution™ sets the mark for superior design with attention to detail, while offering maximum comfort, breathe-ability and durability.

The shoulder area offers 3mm thick Breathe-O-Prene® padding. The low profile padding is porous in nature allowing warm moisture laden air to pass through as it cushions the area thus helping to relieve any potential discomfort.

The Revolution™ utilizes a superior Microfiber Nylon for its exterior shell material. The slightly denser material results in greater durability and longevity. It is also water repellent and anti-static treated. The standard Revolution™ carrier inner lining consists of Breeze Knit™, a moisture wicking, antimicrobial material that provides evaporative cooling. Upgrades are available for the Revolution™ carrier: (1) add a Scent-Lok® inner lining for even more odor control, (2) add the Thor Shield™ to your liner for protection from stun devices such as Taser™, (3) add the Tactical Upgrade to your Revolution™ offering: a hide-away medical information strip, a hidden knife pocket, and ID Badge Hook and Loop. Also available - an IFAK pouch to add to your side strap.

EVOLUTION™

EQUINOX™

Breeze Knit™ moisture wicking, anti-microbial inner lining

Poly-Cotton outer shell

LEGACY

LEGACY

Easy Grip Side Straps™

5"x8" and 7"x10" front plate pockets accommodate inserts for added protection

Exterior microfiber nylon shell

Interior microfiber Wearstrip™ provides greater durability

The Evolution™ is AE's proven carrier system. With an exterior microfiber nylon shell and an inner Breeze Knit™ lining, the Evolution™ offers resilience, comfort and breathability. The microfiber shell features both water repellent and anti-static treatments. The Breeze Knit™ inner lining offers moisture wicking and antimicrobial properties.

The inner suspension system and the microfiber Wearstrip™ of the Evolution™ are key to this carrier's proven track record. The Wearstrip™, which is located on the lower inside lining of the carrier, works to prevent deterioration of the carrier along the bottom edge where the vest comes in contact with the duty belt. The inner suspension system holds the protective panels securely in place and prevents them from sagging.

Dual plate pockets on the front of the carrier can accommodate either 5"x8" or 7"x10" inserts for added protection.

The Evolution™ is available in both male and fitted female designs.

The Equinox™ is AE's traditional carrier system. With a Poly-Cotton outer shell and a Breeze Knit™ lining, the Equinox™ offers lightweight, breathable comfort. The Breeze Knit™ inner lining is antimicrobial treated and offers moisture wicking properties.

The Equinox™ comes standard with an inner suspension system designed to hold the protective panels in place and prevent them from sagging.

Dual plate pockets on the front of the carrier can accommodate either 5"x8" or 7"x10" inserts for added protection.

The Equinox™ is available in both male and fitted female designs.

The Lo-Pro™ carrier is designed to keep your body armor snug against the torso, making it ideal for those needing maximum armor concealment for undercover operations.

This sleeveless t-shirt style carrier utilizes Spantron nylon knitted fabric for its outer and inner linings. The Lo-Pro™ offers moisture management capability, providing lightweight breathable comfort while maintaining a near undetectable presence.

The armor panels are secured within internal pockets which allow for overlapping side coverage.

A front internal plate pocket can accommodate a 5"x8" insert for added protection.

CONCEALED RIFLEPLATE

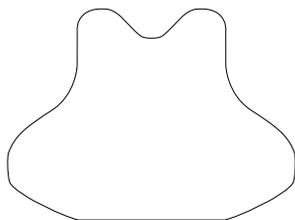

Comprised of Uni-directional Polyethylene and Ceramic, the C-Shock Plate brings a revolutionary concept to your concealable vest - Rifle Protection. Tested to some of the most common rifle rounds on the street (AK-47 PS Ball, .556 Ball, .556 Green Tip), this plate has the strength to truly make a difference, while retaining a thin, lightweight profile that can fit into the soft trauma pocket on your vest. At 1.7lbs, you no longer have to make a choice between comfort and protection. You can have it all.

OVERTPATROL

- OVERT PATROL CUTS -

LEGACY

The outer patrol carriers by Armor Express are specifically designed to fit your Armor Express concealable panels.

The same custom sized panels used in your concealable will seamlessly fit in this lineup of duty specific outer carriers. Everything from dress vests to load bearing utility vests.

DRESS VEST

The Dress Vest is the AE solution to the growing demand for an outer carrier system that is suitable for daily use by Patrol Officers. Designed to be indistinguishable from the uniform shirt, the professional looking Dress Vest helps to camouflage the presence of your protective body armor panels. As an outer carrier, the Dress Vest allows users to cast off their armor without the necessity to remove their uniform shirt first.

Made from durable nylon material, this carrier features adjustable shoulders with epaulets. An internal plate pocket accommodates 5"x8" inserts for added protection. An internal cummerbund holds the rear panel in place and assists in donning the vest. The two sewn on chest pockets are fully functional and include a pen/pencil sleeve.

Department patches can be sewn on to the front of the carrier at no additional charge.

OVERT CARRIER SYSTEM (OCS)

Standard 4 pocket configuration
(Radio, Zippered Utility, Double Mag, Mini Flashlight)

Turn your standard concealable armor into an external load bearing vest with the redesigned Overt Carrier System (OCS). Made from a heavy-duty nylon material, the OCS features front internal plate pockets accommodating 5"x8" trauma plates up to 10"x12" streamlined rifle or special threat plates, fully adjustable shoulders, and an internal cummerbund for securing the carrier in place. The OCS is sized to specifically fit your Armor Express custom legacy armor panels.

Optional front and rear ID tags can be added to the OCS. The OCS can be ordered in three (3) styles: slick (no pockets), with four (4) standard sewn on pockets (as shown) or with MOLLE webbing (no pockets).

Department patches can be sewn on to the front of the carrier at no additional charge.

A female structured version of the OCS is also now available. The female front internal plate pockets accommodate 5"x7", 7"x9", and 8"x10" trauma plates, depending on the size.

INSTRUCTOR VEST (OCS)

QUILTED CARRIER SYSTEM (QCS)

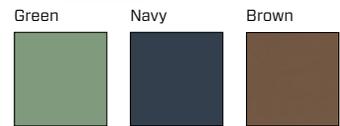

MED VEST

O.C.S. shown here in Instructor configuration (Range Red)

LEGACY

LEGACY

LEGACY

Similar to the OCS, the Med Vest is made from durable nylon material and features a reflective stripe for easy day or night identification. Standard features include internal front plate pockets accommodating 5"x8" trauma plates up to 10"x12" rifle or special threat plates, fully adjustable shoulders, and an internal cummerbund to secure the vest to the wearer. Optional front and rear ID tags are available.

The Quilted Carrier System (QCS) converts your concealable armor into an insulated, comfortable, overt carrier. With a durable quilted cotton shell, the QCS offers front internal plate pockets that accommodate 5"x8" and 7"x10" trauma plates, an internal cummerbund to anchor the vest in place, a fully functional chest pocket and front hand warming pockets.

Department patches can be sewn on to the front of the carrier at no additional charge.

ECHO

New! The Echo™ is an overt patrol carrier that will convert your legacy concealable soft armor into a convenient and comfortable outer vest option. MOLLE, slick, and 4-pocket configurations available.

Standard Features:

- Side opening, fully adjustable closure system
- Heavy duty nylon shell
- Internal plate pockets, accommodating UpArmor packs
- Mesh in key friction zones
- Front and rear hard armor plate pockets
- Communication wire guides
- Hidden ID tag and badge tab attachment points
- Adjustable shoulders with mic tab epaulets
- Internal cummerbund

New! The Traverse™ is an overt patrol vest that will convert your legacy concealable soft armor into a front zip-side opening vest. This vest offers both MOLLE and slicked out options to meet your departmental requirements while providing as much customization and utility as possible.

Standard Features:

- Front zip - side opening design
- Heavy duty nylon shell
- Internal plate pockets, accommodating UpArmor packs
- Mesh in key friction zones
- Front and rear hard armor plate pockets
- (2) Hidden chest admin pockets
- Rear hidden lumbar map pocket
- Hidden ID tag and badge tab attachment points
- Ambidextrous vertical knife/pen slots
- Adjustable shoulders with mic tabs

HARD CORE™ DM

Dual front and rear external plate pockets which accommodate 10"x12" or 8"x10" rifle plates

Removable ID badges

1" MOLLE webbing

Fully adjustable cummerbund system

The Hard Core™ DM accommodates standard concealable armor to provide protection to the vital organs of the torso.

Made from durable nylon material, the Hard Core™ DM features external plate pockets accommodating 10"x12" or 8"x10" rifle plates, and has fully adjustable padded shoulders. An adjustable external cummerbund system alleviates the weight burden from the shoulders by distributing it across the abdomen. The cummerbund has internal pockets to accommodate additional 5"x8" side armor packs while the front flap offers an additional 7"x10" plate pocket.

The optional front and rear ID tags can be added to the jacket as well as the optional MOLLE platform which will allow for 360 degrees of mission specific pocket configurations.

Ballistic accessories include shoulder pads, a retractable pull-down groin guard, detachable split back collar, throat protector, and deltoid protectors with optional custom ID tags. Department patches can also be sewn on to the deltoid protectors at no additional charge.

The Hard Core™ SU exhibits lightweight, low profile architecture with fully adjustable shoulders and waist. It uses Legacy Concealable panels for higher mobility and vehicle operations. The SU features the Dynamic Cummerbund System allowing the user to breathe and move much more efficiently. The shoulder strap geometry is improved for enhanced ergonomics. The liner shell material features 3D spacer mesh for improved heat, moisture, and debris dissipation. MOLLE has been added to the plate pocket flap for more modularity and attachments.

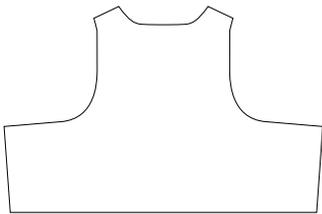

Standard Features:

- Utilizes legacy sizing system
- Dynamic cummerbund system with 6"x10" soft armor pockets
- MOLLE webbing platform
- 3-Dimensional spacer mesh lining
- Front and rear hard armor plate pockets
- Integrated carry handle
- Custom ID tag attachment points

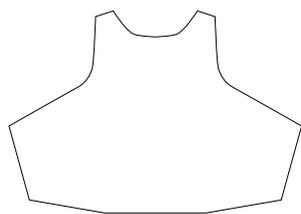

TACTICAL

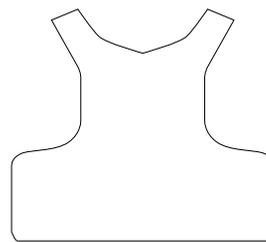

-TACTICAL CUTS-

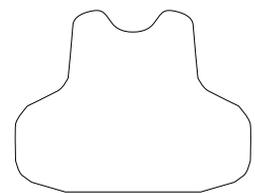

BALCS

LIGHTHAWK

WOLVERINE

ALPHA

- Fully adjustable shoulder straps
- Shoulder pads with foam for added comfort - with optional ballistic inserts
- Non-skid shoulder grip
- 3"x6" ID attachment point
- Utility Ports
- Rapid quick release system
- Ambidextrous horizontal knife sleeve
- 3D spacer mesh inner lining
- Trilogrid™ laser cut MOLLE webbing platform
- Kangaroo utility pouch
- Inner cummerbund pocket for optional soft armor inserts

New! The Raven™ was specifically designed with the fast-paced, low-profile operator in mind. The Trilogrid™ laser cut MOLLE webbing, along with the aggressive structure of the vest make it a high-speed, fully customizable tactical carrier solution. The Raven™ features a single point quick release system that is considered one of the most efficient in our industry. As easy to reassemble as it is to release, this system offers real-world applications, and encourages you to incorporate it into your daily tactical training regimen.

Standard Features:

- Trilogrid™ Laser cut MOLLE webbing platform
- Ambidextrous horizontal knife sleeves
- Utility ports on shoulder pads and front of carrier
- 3D spacer mesh inner lining for air channel and heat reduction
- Kangaroo utility pouch for document and equipment storage
- Rear carry handle
- Fully adjustable cummerbund with pockets accommodating soft armor inserts
- Bottom loading rifle plate pockets on front and rear of carrier
- Non-skid shoulder grip to improve weapon mounting and control

WOLVERINE™

**Wolverine™ shown here with optional ID tags, 1" MOLLE webbing, split back collar, throat protector, upper arm sleeves, groin guard and non-skid yoke with ambidextrous butt-stops.*

The Wolverine™ Special Operations Tactical vest is one of the most proven tactical vests on the market today. Boasting a number of innovative features, the Wolverine™ offers outstanding tactical protection with many options to customize the jacket to your individual needs.

The front and rear of the Wolverine™ are connected by an adjustable shoulder attachment system, and an adjustable external cummerbund system which alleviates the weight burden from the shoulders by distributing it across the abdomen. The cummerbund has internal pockets to accommodate additional 5"x8" side armor packs while the front flap offers an added 7"x10" plate pocket. The Wolverine™ also comes standard with dual front and rear external plate pockets which accommodate 10"x12" or 8"x10" rifle plates.

The upper chest area offers mic tabs, while the rear half features the Armor Express Sling Hooks, which keep the rifle sling off of the operator's neck. The rear also offers a tough drag strap that is sewn all the way through and around the vest. A built-in hydration pocket, which can accommodate any size personal hydration system, is located on the rear of the jacket.

A number of ballistic accessories are available for the Wolverine™ including a retractable pull-down groin guard, throat protector, and deltoid protectors with optional custom ID tags. The optional split back collar provides nape protection while adding comfort when wearing a ballistic helmet. Elastic channels at the base of the collar can be used for mic wires or hydration tubes.

Optional front and rear ID tags are available for added customization. Department patches can also be sewn on to the deltoid protectors at no additional charge.

The optional MOLLE platform provides 360 degrees of mission specific pocket configurations. Order it with the optional flex cuff pockets, belt keepers, and broad non-skid yoke (with or without dual butt stops) to round out this truly capable piece of gear.

The Bulldog™ includes features originally tailored to the field of corrections; yet has been adapted for use in multiple arenas. The prominence of MOLLE webbing, along with the aggressive structure of the vest make it ideal for adapting to the demanding, versatile needs of aggressive and varying scenarios. The Bulldog™ can be used as a crossover vest between corrections, tactical, and field operations. Designed to be lightweight and agile, The Bulldog™ does not accommodate deltoid, groin, throat, nape, or collar armor - and the hard armor plate pockets are ideally suited for thinner stand-alone and ICW hard armor.

Standard Features:

- “Man-Down” cable attachment point for hands-free extraction
- Removable rear panel for quick mission load-out adjustments
- Diagonal knife sleeve on front of carrier
- Hydration and communication wire channels on shoulder pads
- 3D spacer mesh inner lining for air channel and heat reduction
- Cumberbund utility pocket for document and equipment storage
- Reinforced 1” rear carry handle
- Ballistic shoulder pads
- Fully adjustable cummerbund with pockets accommodating soft armor inserts
- Front outer admin pocket for document or equipment storage
- Bottom loading rifle plate pockets on front and rear of carrier; accommodate thinner NIJ threat level III In-Conjunction-With (ICW) hard armor rifle plates or Special Threat Plates.
- Non-skid shoulder grip to improve weapon mounting and control

LIGHTHAWK™ ACCESSORIES

HARD BAL™

Accessories/pouches sold separately

LIGHTHAWK PC™

The Hard Bal™ plate carrier. A low-cost yet heavy-duty plate carrier that meets the needs of an active shooter situation. The Hard Bal™ plate carrier supports 10"x12" hard armor plates to protect against rifle threats. A cost-effective solution for everyday patrol officers.

Standard Features:

- Dynamic Cummerbund System with soft armor pockets
- MOLLE Webbing Platform
- Front and Rear Hard Armor Plate Pockets
- 3"x6" ID tag attachment surface (loop)

Rapidly enhance your level of ballistic protection with the Armor Express Lighthawk™ PC, a heavy-duty yet streamlined "Plate Carrier" with unmatched features. Perfect for active shooter response situations, the Lighthawk™ PC provides protection every Patrol Officer should have access to.

Standard Features:

- Dynamic Cummerbund System with 6"x10" soft armor pockets
- Quick Release Cable System
- MOLLE Webbing Platform
- 3-Dimensional Spacer Mesh Lining
- Removable Sling Hooks
- Front and Rear Hard Armor Plate Pockets
- Front Utility Pouch
- ID Tag Attachment Points

RAPID BASE™

Accessories/pouches sold separately

New! The Rapid Base Plate Carrier offers a simple and effective tool for any active shooter scenario. Easy to put on, and modular enough to carry any custom load out (magazines, tourniquet, IFAK, etc), this vest gets the job done and fits nicely in both a cramped trunk as well as your budget. The plate pockets accommodate NIJ III and IV hard armor plates, capable of stopping center fire rifle rounds, ideally placed over your soft lower level duty armor.

Standard Features:

- Front and rear plate pockets that can accommodate 10"x12.5" plates, up to 1.25" thick
- MOLLE webbing platform on front and back for complete customization
- Adjustable shoulder straps to ensure proper fit
- Side straps, adjustable with buckles for rapid donning/removal
- Front and back hook and loop ID tag attachment points
- One size fits most

RESPONDER BASE™

New! The Responder Base Plate Carrier provides a robust and layered platform for any active shooter response. With reinforced padding for extended duty, this rig is modular enough to handle your custom kit (magazines, tourniquet, IFAK, etc), while keeping you agile enough for any change in environment. The plate pockets accommodate level III and IV hard armor plates, capable of stopping center fire rifle rounds, and front utility pockets offer extra storage for needed gear.

Standard Features:

- Front and rear plate pockets that can accommodate 10"x12" plates, up to 1.25" thick
- MOLLE webbing platform on front and back for complete customization
- Padded mesh inside lining for weight and pressure management
- Two front hook and loop pockets allow for extra magazines and storage
- Adjustable padded shoulder straps with padded mesh
- Reinforced carry handle
- MOLLE Cumberbund offers additional modularity and attachment points
- The removable & adjustable cummerbund comes in two sizes: XS-M (Fits chest Size 35-44) or L-2XL (Fits chest Size 42-52)

New! A full lineup of the most popular pouches are now available on-demand in black and ranger green. Our in-stock BASE line is compatible with all MOLLE platforms and offers off-the-shelf availability with affordable modularity. Armor Express still offers our traditional custom pouch line as well; satisfying legacy designs and specific custom needs.

Standard Features:

- Fade Resistant, Moisture Repellent 1000 Denier Nylon
- Mil-Spec 1" PALS/MOLLE Attachments
- Adjustable Hook and Loop Flaps for maximum sizing
- Reinforced Stitching & Tacking throughout

K-9 VEST

ARMORUP K-9 UNITS

Nothing gives a K-9 Handler more peace of mind than knowing that their partner is as well protected as they are.

Capable of accommodating any Armor Express level II, IIIA, and Stab/Spike ballistic package, our K-9 vests are designed for maximum protection, comfort, and durability in the field.

New in 2015 is an improved front buckle adjustment system, enabling officers to custom adjust the vest to each K-9 partner and ensure a proper fit.

We've got your K-9 partner covered with our custom sized K-9 armor. With improved comfort, mobility and reduced weight, the K-9 armor offers outstanding functionality.

The K-9 features a robust crowd control handle, two 2" D-Rings for short or long leads, an elastic pocket for flashlights and tracking devices, as well as optional left and right ID tags.

Made from durable nylon material, the K-9 has six 2" buckles for ease of getting into, adjusting and removing. The K-9 provides maximum coverage to the vital organs, and even has a rear extension panel to accommodate longer torsos.

Standard Features:

- Belly and chest coverage
- Adjustable 2" buckles
- 2" D-Rings for short or long leads
- Crowd control handle

Optional upgrades:

Ballistic rear extension (accommodates longer torso k-9s)

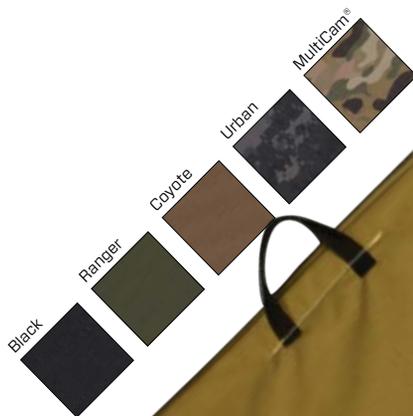

Armor Express is the leading manufacturer of K-9 Armor in the United States and proudly protected over 1,000 K-9 teams in 2014 alone.

BALLISTIC BLANKETS

Ballistic Blankets

Armor Express ballistic blankets are designed to offer level IIIA ballistic protection in a wide variety of tactical situations. Ballistic Blankets can be quickly and easily thrown over windows, doors and walls, or used as a personal shield in hazardous situations. The Blanket is ideal for use in police & military vehicles as it can provide ballistic protection for the seat, window or door.

- Comparable to Level IIIA Ballistics
- Made with 100% Aramid fiber
- Outer shell constructed with heavy duty Poly Duck fabric
- Carry handles
- Rolls up and secures for ease in transporting
- Standard sizes include 2'x6', 3'x6', 4'x4', 4'x6', and 4'x8'
- Custom sizes available

BACKPACKS

AND INTERNAL ARMOR SOLUTIONS

HOW IT WORKS

- Provides the ability to UpArmor any existing backpack or briefcase with Level II or IIIA soft armor in a waterproof ripstop pad.
- B.A.G. offers ballistic protection tested to the NIJ 0101.06 standard level II and IIIA.

RIFLE PLATES

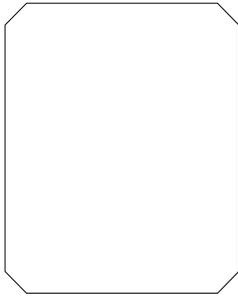

Long gone are the days of a “standard” rifle plate. You. Your Team. The Situation. All Dynamic.

Your kit has become both customized and invaluable - and so has the need to find the right plates. Whether it is a level IV plate designed to stop a single armor-piercing round, a level III plate built for multiple hits from common street rounds, or a special threat option paired with soft ballistics to keep you agile and protected Armor Express has you covered.

BALCS

SAPI/ESAPI

MIL·SPEC·SOFT·ARMOR

QUANTUM™

The Quantum IIIA soft armor is not only NIJ 0101.06 Certified, but built to meet both DEA and US Military standards. It is a robust ballistic armor package currently being used by the Department of Defense and numerous federal law enforcement agencies.

Meets or exceeds the following protocols and tests:

DoD Frag Protection

NIJ 0101.06 level IIIA certification

DEA Protocol

FMS™

The FMS is a workhorse in the military, sporting high performance in stopping power and a cost effective price tag. The FMS can be found in numerous Federal and DoD departments.

Meets or exceeds the following protocols and tests:

DoD Frag Protection

NIJ 0101.06 level IIIA certification

DEA Protocol

PROTECTIVE UNDER-GARMENT P.U.G.

The Protective Under Garment (PUG) was initially developed as an add-on component to the IOTV. The PUG was designed to protect the wearer's femoral artery and soft tissue protection from IEDs and other fragmentation threats while maintaining ease of movement, breathability and comfort.

- Ergonomic shape allows for maximum comfort
- Snug design conforms to body shape while retaining range of motion
- Ballistic Inserts remain positioned during running or athletic activity

PUG insert

Sewn in ballistic material

ARMY LEGACY CONCEALABLE BODY ARMOR C.B.A.

7"x8" armor pocket accommodates multiple plates: trauma, ESBI, and ESAPI armor

Shoulder and waist adjustment points

ALPHA

Army Legacy Concealable Body Armor (CBA): A critical safety item, the Army Legacy CBA comes in eleven sizes and is used by Military Police and Department of the Army Civilian Security Guards. The CBA provides IOTV level fragmentation protection, is National Institute of Justice (NIJ)-STD-0101.06 Level IIIA certified and contains a 7"x 8" trauma plate/pack that provides NIJ-STD-0115.00 Level 1 edged blade/spike protection when used in conjunction with the CBA vest. Front and back internal plate pockets also accommodate the Enhanced Small Arms Protective Insert (ESAPI) and the 7x8 Enhanced Side Ballistic Insert (ESBI) for a wide variety of operational environments from police to stability and support operations.

AIRCREW FLEXIBLE BODY ARMOR (F.B.A.) AIR WARRIOR SYSTEM

Aircrew FBA: The Aircrew Flexible Body Armor (FBA) vest is constructed with hook-and-loop side and shoulder closures for ease of donning and adjustment; it is used by aircrew for protection against fragmenting munitions and handgun threats. The Aircrew FBA vest includes an external front pocket and an internal back pocket, each of which accommodates an Enhanced Small Arms Protective Insert (ESAPI) that consistently defeats hits from small-arms rounds. Both pockets have a quick-release strap that, when pulled, ejects the ESAPI when it is deemed by the wearer that the presence of the plate is hazardous. The Aircrew FBA vest also has internal chambers, with hook-and-loop seals, that contain the soft ballistic inserts. The ballistic inserts are feathered in three layers on the sides to decrease bulk where the front and back inserts overlap.

The Aircrew FBA comes in five sizes and is manufactured in accordance with ANVS-PDN-10757, Rev. F dated August 31, 2011.

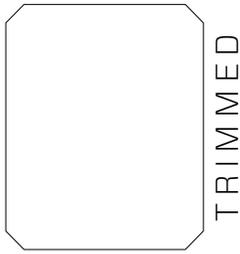

NAVAL SECURITY FORCES VEST N.S.F.V.

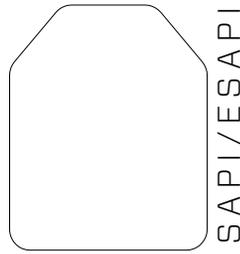

NSFV: Robust and mobile, the Naval Security Forces Vest (NSFV) is worn by U.S. Naval personnel aboard Navy ships, and at Naval Activities, U.S. Navy Military Sealift Command and other DoD activities. The NSFV provides modular components for tailoring protection levels against multiple ballistic and fragmentation hazards while performing security and Anti-Terrorism/Force Protection (AT/FP) duties.

The NSFV comes in seven sizes and is manufactured in accordance with Navy purchase description NQ/PD 10-01D dated March 4, 2014. Additional features include MOLLE webbing, and front and back ESAPI plate pockets.

MILITARY R&D

TESTED IN MORE THAN JUST A LABORATORY

We believe that many of the best ideas come from the field - often soaked in mud and sweat. We incorporate a cadre of experts from around the country and expand our R&D sphere to those that have seen the danger firsthand - thus creating products with leading edge technology that save lives. This is our mission.

Todd Olson, Director of Federal Sales, Marine Corps Veteran running the Marine Corps Marathon wearing a prototype military vest. ▶

STRAP A VEST ON YOUR BACK AND RUN A MARATHON. THAT'S A TRUE TEST.

MODULAR ARMOR SYSTEM M.A.S.

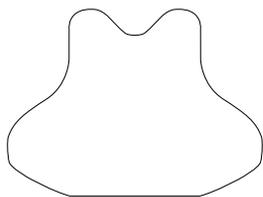

By request of the US Marine Corps, Armor Express began fast prototype work on the Modular Armor System (M.A.S.) Meant as a replacement system for both the IMTV and the USMC Plate Carrier, the M.A.S. would incorporate a Quick Release system, dynamic cummerbund, 3-D spacer mesh for rapid heat dissipation, and integrated hydration system among other attributes.

In concert with the USMC, the Armor Express Rapid Prototype Center and Ballistics Research Lab produced cutting edge deliverables in record time.

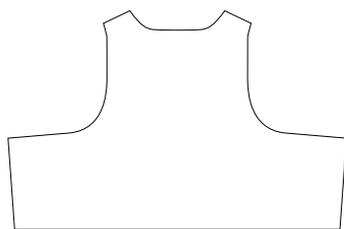

CORRECTIONS/RIOT

-CORRECTIONS ARMOR CUTS-

LEGACY

BALCS

In the dynamic environment of the corrections world, threats are often presented in unforeseen packages. Puncture, spike, and stab devices are prevalent and can pose a serious challenge to your armor. Thus, we offer full lineup of NIJ 0101.06/0115.00 Certified armor packages to give you the peace of mind required to do the job. Having engineered a full complement of options in both stand-alone as well as combination ballistic/stab packages - Armor Express provides unprecedented protection levels in systems that are as comfortable as they are robust.

CORRECTIONS•SOFT•ARMOR

GEMINI™

Officers needing extra protection look to Gemini™ dual purpose armor for providing the utmost in ballistic and spike protection. The Gemini™ is a versatile performer and comfortable to wear.

Comprised of Twaron® Microfilament Fibers and spike resistant Aramid materials.

Level IIA/Spike 3
Level II/Spike 2
Level IIIA/Spike 3

TAURUS™

Taurus™ correctional armor provides corrections officers essential puncture protection from prison shanks and spikes and is extremely light weight and flexible.

Comprised of Twaron® Microflex material.

Spike 1, 2, 3

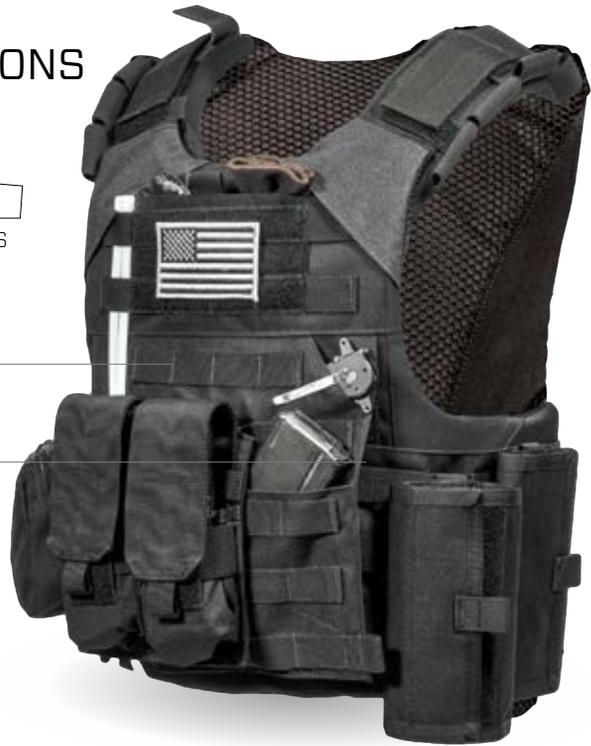

NIJ STAB RESISTANT PROTECTION LEVEL STRIKE ENERGIES

Protection Level	“E1” Strike Energy		“E2” Overtest Strike Energy	
	J	ft· lbf	J	ft· lbf
SPIKE 1	24 ± 0.50	17.7 ± 0.36	36 ± 0.60	26.6 ± 0.44
SPIKE 2	33 ± 0.60	24.3 ± 0.44	50 ± 0.70	36.9 ± 0.51
SPIKE 3	43 ± 0.60	31.7 ± 0.44	65 ± 0.80	47.9 ± 0.59

BULLDOG

CORRECTIONS SPECIAL OPERATIONS

Shown here in a corrections specific load-out, the Bulldog™ includes features specifically tailored to the field of corrections. The prominence of MOLLE webbing, along with the aggressive structure of the vest make it ideal for adapting to the demanding, versatile needs of corrections scenarios.

MOLLE Webbing throughout vest

BALCS aggressive cut structure

Accessories/pouches sold separately

TRAVERSE OUTER CARRIER

MOLLE CONFIGURATION

Armor Express outer carrier vests are ideal for corrections officers that prefer to have the ease and added utility of an overt armor option. The new Traverse outer carrier in MOLLE configuration also gives the operator full pouch customization - so you can kit it out specific to your corrections needs.

REVOLUTION

TACTICAL UPGRADE AND IFAK

The Revolution™ carrier is the most popular concealable vest option chosen by our corrections customers. By selecting the Tactical Upgrade and adding an IFAK pouch, this vest will offer the wearer further security - allowing them to concentrate on their job at hand, rather than worrying about their armor.

RIOTGEAR

Riot and Capture Shields

- Concave and convex designs
- Lexan body shield (clear polycarbonate material)
- Superior optical quality
- 20"x36" - 6 lbs. x .150"
- 24"x48" - 8.5 lbs x .150"
- Ergonomic handle
- Quick release strap
- 1 year limited warranty

Options: Customized ID label

AECX30 Riot Helmet

New! A Multi-Purpose Riot/ Duty helmet, meeting the NIJ 0104.02 Standard. Lightweight, yet durable the polycarbonate shell provides excellent protection while keeping maximum visibility.

- Detachable face shield with liquid seal
- Polystyrene foam liner with 1/4" thick top pad
- Self-wicking antimicrobial antifungal liner
- Available in (3) sizes, capable of additional sizing adjustments in the field

Optional Helmet Carry Bag

Optional Wire Face Shield

TRUECAPABILITY

WE'LL LET YOU DECIDE FOR YOURSELF

Armor Express has conducted hundreds of armor shoots - where we come to you and bring an arsenal of guns and rounds because we want you to be confident in the armor you are outfitting your officers with. Contact us and set up an armor shoot - we'll bring the goodies...and leave you with confidence in the product.

A collection of rounds defeated by one of our vests at a recent armor development session. These rounds included special threats specifically requested by our customers. ▶

WHAT'S YOUR STANDARD? LET US COME TO YOU AND PUT OUR ARMOR TO THE TEST.

CAPABILITY AND CAPACITY

- **Administrative Headquarters (10,000 sq ft)** This facility houses the personnel who maintain our contract and ITAR/Licensing compliance. In addition the facility contains customer service, marketing, inside sales and accounting departments.
- **R&D Technology Center (10,000 sq ft)** A state-of-the-art ballistic and non-ballistic development workshop, and an indoor ballistic research laboratory with up to level IV testing capability.
- **Production Facility (25,000 sq ft)** As part of a registered quality program, this certified campus houses the industry's most cutting edge production technology. Armor Express has adopted a LEAN manufacturing management system and strives to provide the greatest value to customers while consuming the fewest resources. Armor Express continually focuses on improving efficiency, quality, and safety in the workplace. Boasting an experienced and dedicated workforce, Armor Express' products embody true American craftsmanship.

TRUEINSIGHT

A letter from Amanda Martin (Save Cole Martin's wife)

Please pass on our thanks and let everyone know how sincerely and entirely grateful we are. I didn't realize before you all made me feel better how bad I had been feeling, and I can't tell you how much good you've done through your Saves Program. After meeting you all and seeing everything that you do, I know that when Cole is wearing an AE vest he's as safe as he can be doing what he does. Meeting all of you, touring the facility, and seeing the vest actually shot and tested has reinforced my peace of mind enormously, which I honestly didn't think was possible after Cole's shooting. I thought I would always have that seed of doubt and fear in the back of my head, even though the vest he was wearing saved his life. I didn't know HOW it worked or WHY. It seemed like an unexplainable thing, and as such I guess I thought it was a fluke. I didn't know there were so many layers, and that the bullets don't penetrate all the way through most of them... I would never have believed there were actual people sewing the vests together, putting so much care and work into them - putting so much of themselves into what they do. They're saving lives- you all are. It's so important that you all know how much you mean to all of us. Thank you so much. Thank you for doing what you do. Thank you for saving our family, and thank you for allowing us to meet other families and hear other stories as well. Thank you so much.

I could never find the words to tell you how incredibly grateful we are - every moment of our future happiness exists because of you all. You're our angels.

Thank you, thank you, thank you.

Amanda Martin

◀ Officer Cole Martin meeting a member of the Armor Express team responsible for making his Quantum IIIA vest. His wife wrote us this letter after their visit to our facilities. ▶

TRUSTING A COMPANY WITH YOUR LIFE

One thing has remained crystal clear to Armor Express during our time manufacturing armor - our customer commitment needs to extend beyond the sale. You depend on your vest to stop bullets in the most critical of moments. We recognize that you have not only entrusted us with your safety, but the legacy of your family as well. We take that commitment seriously and welcome you into OUR family.

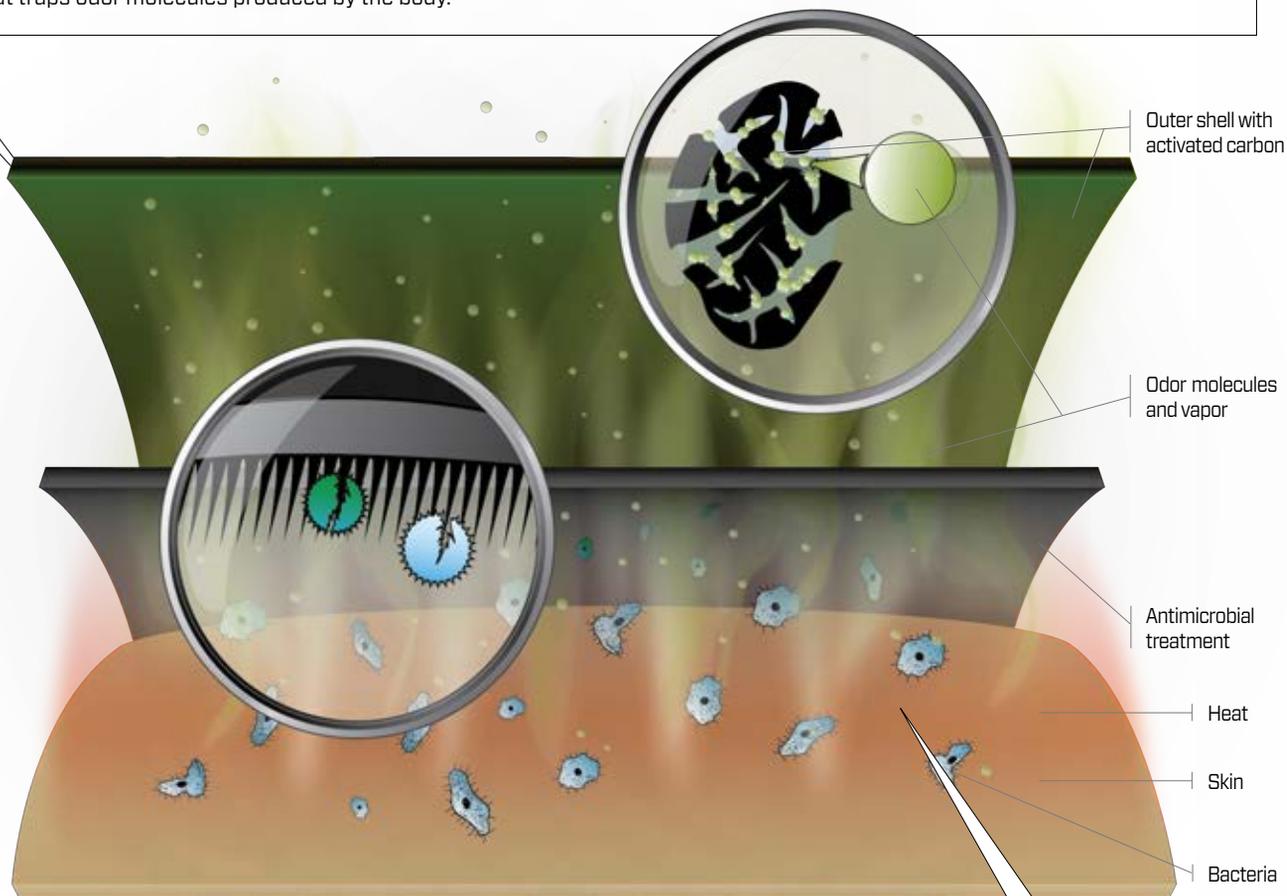

**OUR COMMITMENT DOESN'T END AT THE POINT OF
SALE - WE WILL TRULY HAVE YOUR BACK.**

ODORCONTROL

We teamed up with **Scent-Lok Technologies** and integrated both the **SCENT-LOK®** activated carbon and antimicrobial treated fabrics directly into some of our key products. This proven scent control combination yields a more comfortable vest for the officer by offering a substantial duration of odor control.

We utilized the activated carbon technology by **SCENT-LOK®** in order to ensure the most odor absorbent carriers on the market.

Activated carbon is one of the most effective ways to remove foul odors. Within the fabric of clothing the carbon creates a strong bond that traps odor molecules produced by the body.

ANTIMICROBIAL

Antimicrobials are substances that inhibit and prevent the growth of bacteria.

Antimicrobials work in fabric by targeting and reducing the bacteria that causes odor. They do this by destroying cell membranes and by inhibiting their reproduction.

Our Revolution™ carrier can be lined with both the **SCENT-LOK®** activated carbon and antimicrobial treated fabrics. (See p. 13)

SHIELD

Our Revolution™ carrier when optimized with **THORSHIELD®** technology will protect officers from TASER® brand devices and stun guns. (See p. 13)

FIT/ALTERATIONS

ENSURING THE RIGHT FIT

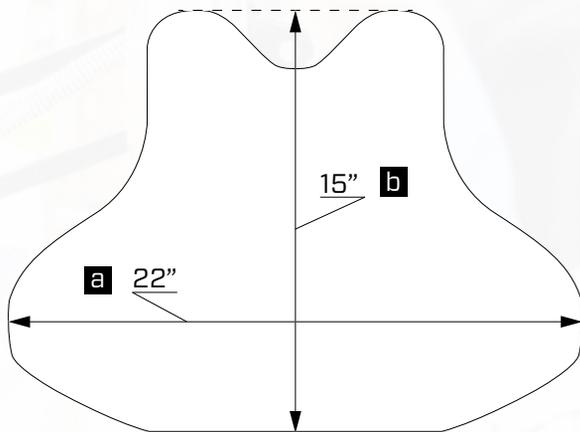

WE BELIEVE THAT THE BEST WAY TO ENSURE A PROPER FIT IS TO UTILIZE OUR VAST NETWORK OF AUTHORIZED ARMOR EXPRESS REPS AND DEALERS. CUSTOM SIZING CAN BE PERFORMED QUICKLY AND ACCURATELY, AT NO COST TO YOU.

Sizing/Measurement/Fit Information:

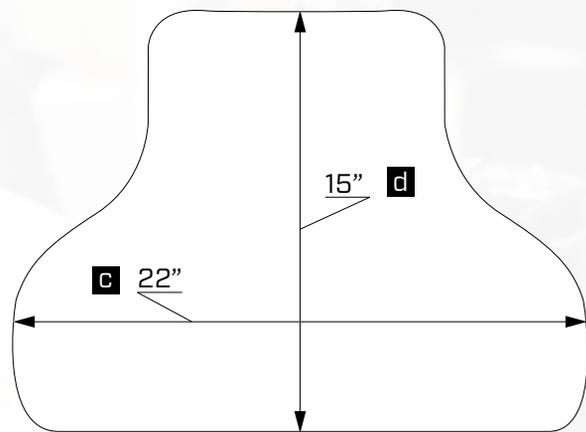

AE ALPHA patterns and AE Legacy patterns are NOT interchangeable - each has their own patterns, meant for different applications. ALPHA panels cannot be inserted into Legacy cut carriers, and vice versa. Contact customer service with the pad serial number and we can help you to identify the correct compatible carrier systems.

Some smaller size vests, including some structured females will only accommodate the smaller size trauma and rifle plates. Your AE Dealer can help you to identify which packs/plates work with each vest.

Armor Express uses a simple sizing nomenclature to identify our panel size. See below for how we measure and the corresponding pad identification numbers.

Front ballistic panel size: 2215

Rear ballistic panel size: 2215

MORE INFO:

For additional information about sizing and fit, visit our website at www.armorexpress.com - There we have a vast library of information on our ballistic and non-ballistic products as well as instructional tutorials.

CUSTOM-FIT GUARANTEE:

Armor Express offers a custom-fit guarantee. Armor Express will refund, exchange, or alter body armor free of charge if the armor is returned within 30 days from the date of purchase.

ARMOR GUIDELINES

BODY ARMOR

101

- Armor Carriers have **no** ballistic properties – ballistic panels must be inserted to provide ballistic protection.
- Care Instructions: Carriers can be machine washed – **do not** submerge ballistic panels. Wipe with damp cloth only and refer to care instructions printed on the panels themselves.
- Armor Express recommends that you break in your armor panels prior to wearing for the first time, to ensure comfort. Refer to guide included with armor to properly break in your ballistics prior to initial use.
- ID Tags and Pouches are **not** included with Tactical/Outer Carriers – they must be ordered separately.

WARRANTY INFORMATION:

Your ARMOR EXPRESS vest has been made in accordance with our quality control standards. This vest is warranted to be free of defects in material and workmanship, subject to the following limitations. Visit www.armorexpress.com for the latest Warranty information and details.

The CARRIER is warranted for eighteen (18) months from date of user purchase. The PANELS are warranted* for five (5) years from date of user purchase.

BASE products are warranted for ninety (90) days from date of user purchase.

The Limited Warranty begins with the date of purchase of this ARMOR EXPRESS Body Armor unit. If purchased directly from Armor Express, the date begins from the invoiced sale date; if purchased from dealer/distributor, date begins from the date sold to the agency/end user, not to begin later than 12 months of date of manufacture. Proof of purchase **MUST** be provided with date; if not, default date is five (5) years from date of manufacture of ballistic panel. A valid warranty claim will be honored on a prorated basis. In order to qualify for this warranty, you must complete and mail the attached warranty card or complete the online warranty registration process at <http://www.armorexpress.com> within thirty (30) days of receipt of vest. This warranty is extended to the original user-purchaser only. This warranty is void if the maintenance care as stated on the protective panel label has not been followed, or if the product has been altered in any matter after delivery to the purchaser, or if the product has been subjected to abnormal use or abuse. Since coordinated and compatible protective panels and carrier are essential for proper protection, use of a carrier not produced or approved by ARMOR EXPRESS voids the warranty.

In the event a defect is found in either component of your vest (carrier or protective panels) during the applicable warranty periods, return the vest and carrier directly to ARMOR EXPRESS, ATTN: RETURNS, at 788 North M-88, Central Lake, MI 49622, postpaid. ARMOR EXPRESS, at its discretion, without cost to you, will repair or replace the defective part or the entire vest or refund the purchase price on a prorated basis.

WE DISCLAIM LIABILITY FOR CONSEQUENTIAL DAMAGES. WE DISCLAIM ANY EXPRESSED OR IMPLIED WARRANTY, INCLUDING ANY IMPLIED WARRANTY OR MERCHANTABILITY AND FITNESS FOR PARTICULAR PURPOSE OTHER THAN AS PROVIDED ABOVE.

Armor Express will refund, exchange, or alter body armor free of charge if the armor is returned within 30 days from the date of purchase. Armor Express will not refund or exchange body armor if it shows any signs of wear or damage. Armor Express will alter body armor after 30 days from the date of purchase for a fee of \$50.00 for concealable body armor, and \$100.00 for tactical. Please contact customer service for details on tactical armor alterations at (231) 544-6090

Online warranty forms can be filled out here: <http://www.armorexpress.com/wform>

ABOUT OUR COMPANY

ARMOREXPRESS

Located in Northern Michigan, Armor Express designs, manufactures, and markets a full line of NIJ and DoD certified ballistic and stab/spike resistant concealable and tactical body armor, K-9 armor, ballistic blankets, and accessories. It is our mission to save lives by providing superior quality body armor with unparalleled protection, comfort, wearability, and service. Armor Express was incorporated in 2005.

One in every five police officers in America is wearing an Armor Express vest.
